BOOST YOUR NEXT CONFERENCE WITH HEALTH TOURISM TRAINING WORKSHOPS FROM MARIA TODD

Offer fresh, new perspectives, timely advanced concepts and guidance, and attract investors, stakeholders, regulatory authorities, banking, marketing, and practitioners, facilities, insurers, brokers, and facilitators to your event. Audiences have "infomercial burnout" and numbers are down. Conferences, congresses, and expos offer too many panel pitches, not enough depth on any topic and assume everyone is there for the networking. Maybe they came to learn. Should you risk disappointing them?

The most successful event planners understand that providing quality content is critical to a successful event and is also crucial for receiving a positive audience response. A speaker with specific subject matter expertise can provide essential insights on industry trends and best practices to your audience.

WHY MARIA TODD?

Because as the only seasoned professional speaker and trainer and internationallypublished author with over 30 years of medical tourism industry experience, I complement and reinforce local expertise and add credibility, substance, depth of knowledge and value to your events. ...and I never sell or promote my services from the podium.

I love to teach and watch the audience "finally get it"!

I deliver high-energy, thought-provoking or motivational presentations to encourage your audience to adopt new concepts and conquer new challenges.
I am fearless about sharing lessons learned at other destinations and controversial critical analysis of strategies that *should* be copied and highlight those that should *never* be repeated.
